alleo to seem tenni bell 3 (Sem-6/CBCS) ZOO HC 1

2022 ZOOLOGY

eilos tesidorigont (Honours)

Paper : ZOO-HC-6016

## (Developmental Biology)

Full Marks : 60

Time : Three hours

The figures in the margin indicate full marks for the questions.

1. Choose the correct answer of the following: (any seven) 1×7=7

- (a) Rolling of sheet of cells over other cells during gastrulation is called as :
  - (i) Involution
  - (ii) Ingression
  - (iii) Epiboly
  - (iv) Invagination

Stem-6/CBCS 200 HC 1/G 2 0/1 0H 002 (2000) @ Contd.

- (b) Embryonic stem cells are derived from
- of embryo
  - (ii) Differentiated inner mass of cells of embryo
  - (iii) Undifferentiated trophoblast cells
  - (iv) Differentiated trophoblast cells
  - (c) The only cell that can give rise to a complete new organism is
    - (i) Pluripotent
    - (ii) Multipotent
    - (iii) Totipotent
    - (iv) Corticopotent
  - (d) In case of chick development, primary organizer is called
    - (i) Hensen's node
    - (ii) Dorsal lip of blastopore
    - (iii) Nieuwkoop centre
    - (iv) Primitive groove

3 (Sem-6/CBCS) ZOO HC 1/G 2

- (e) The type of regeneration found in hydra is
  - (i) Morphallaxis
  - (ii) Epimorphosis
  - (iii) Regeneration
  - (iv) Healing
- (f) In developmental biology, morula is \_\_\_\_\_ cell stage
  - (i) 8 cell memblabiosia
  - (ii) 16 cell laioir
  - (iii) 32 cell offeel
  - (iv) Mass of cells
- (g) In frog, cleavage is
  - (i) Holoblastic and equal
  - (ii) Holoblastic and unequal
  - (iii) Meroblastic and unequal
  - (iv) Meroblastic and discoidal

3 (Sem-6/CBCS) ZOO HC 1/G 3

Contd.

- (h) The incubation period in chick tastes for about
  - 11 days ancellarigrom (i)
  - 21 days *(ii)*
  - 24 days (iii)
  - (iv) 31 days
- (i) The type of cleavage found in insect is
  - Meroblastic (i)
  - Discoidal (ii) (iii) Superficial
  - (iv) Holoblastic
  - The process in which the three germ (i) layers form is called selo gont at (a)
    - Cleavage (i)
    - Gastrulation (ii)
    - Organogenesis (iii)
    - (iv) Metamorphosis
- 3 (Sem-6/CBCS) ZOO HC 1/G 4 8

Write short notes on any four of the

- (f) Describe the metamorphic changes found in amphibians.
- (g) Teratogenic agents.
- (h) Biological theories of Aging.
- 4. Answer **any three** of the following : 10×3=30
  - (i) What is pattern formation ? Describe the process of patterning along the anteriorposterior axis of Drosophila embryo. 2+8=10
  - (ii) What is cytoplasmic determinant ? Describe the process of asymmetric segregation of cellular determinants.

2+8=10

- (iii) Describe the mechanism of fertilization with labelled diagram. 7+3=10
- (iv) Describe the process of early development of chick up to gastrulation. 10
- (v) What is fate map? Describe the fate map of a typical chordate blastula. 3+7=10

- (vi) Describe the process of implantation of human embryo.10
- (vii) What is regeneration ? Describe the morphallactic regeneration found in Hydra.2+8=10
- (viii) What is IVF ? Describe the technique used in IVF. 2+8=10
